danmorgz@googlemail.com | danmorgan.vercel.app | Malaga, Spain (Spanish resident, UK passport; open to relocation)

SUMMARY

Product designer, founder, and engineer with 15+ years building apps across sports, health, fitness, and creative technology. My first sports app, Splashpath, grew to 500k users, became Apple's No. 1 Health & Fitness app in the UK, and led to a four-year global partnership with Speedo. Recently I've been using AI workflows to improve the speed and quality of my product design and engineering work. I am a scrappy mix of product, engineering, and design, optimistic and easy to work with.

SKILLS

Sports product design, iOS app development, Elixir and Phoenix full-stack development, rapid prototyping, AI-assisted product development, audio-guided training products, SaaS/CMS platforms, creative technology, video production and visual asset creation.

EXPERIENCE

Active in Time Ltd, Founder & Product - July 2012 - Present

Founded a health and leisure technology company that grew from a one-person shop to five full-time employees. Splashpath grew to 500k users and became Apple's No. 1 Health & Fitness app in the UK, then relaunched globally as Speedo Fit through an exclusive four-year partnership with Speedo. The company continues to operate profitably, though I am no longer involved day to day.

- Speedo Fit - Global swim training and tracking app created through an exclusive partnership with Speedo.
- Active in Time - Profitable SaaS platform helping UK leisure operators manage pool timetables and programme changes.

Func Main, Founder, Tech & Product - June 2016 - Present

Independent product studio where I've launched, grown, and sold my own apps, alongside selected client work.

- Bend.com - AI, social, and backend feature work for one of the world's most popular stretching apps.
- Happy Floor - Pelvic health app with audio-guided exercises, video tutorials, daily goals, and progression plans.
- Padel Robot Trainer - AI-assisted training companion for a padel ball machine, with structured practice for bandejas, viboras, volleys, and audio-guided workouts.

Pentland Brands, Creative Technologist - March 2018 - September 2019

Rapidly designed and built web/mobile prototypes for global brands including Lacoste, Speedo, and Berghaus.

Beeline, Mobile Product Design & Development - May 2016 - January 2017

Worked with the founders of a bicycle-tech startup to plan, design, and build the first version of the Beeline app after a successful Kickstarter campaign.

Pulse Films, Video Director - 2006 - 2012

Directed over 15 music videos and commercials, including a viral marketing campaign I conceived and directed that won a Cannes Lions Gold Lion.

EDUCATION

Bournemouth University - Bachelor's Degree, TV Production, 2003 - 2006. Grade: 1st.

INTERESTS

Padel, water polo, swimming, Spanish, music, podcasting, photography, and queer community projects. Currently training to compete in padel at the Valencia Gay Games.
